This is some dummy copy. You're not really supposed to read this dummy copy, it is just a place holder for people who need some type to visualize what the actual copy might look like if it were real content.

1. INSTALLATION INSTRUCTIONS

1. Go to your WordPress Backend.

2. Open **Appearance → Themes → Install Themes**

3. Navigate to **Upload**

4. Browse for **.zip** file on your local computer, and **Install** it.

5. Then go to back to **Appearance → Themes**, and **Activate** theme
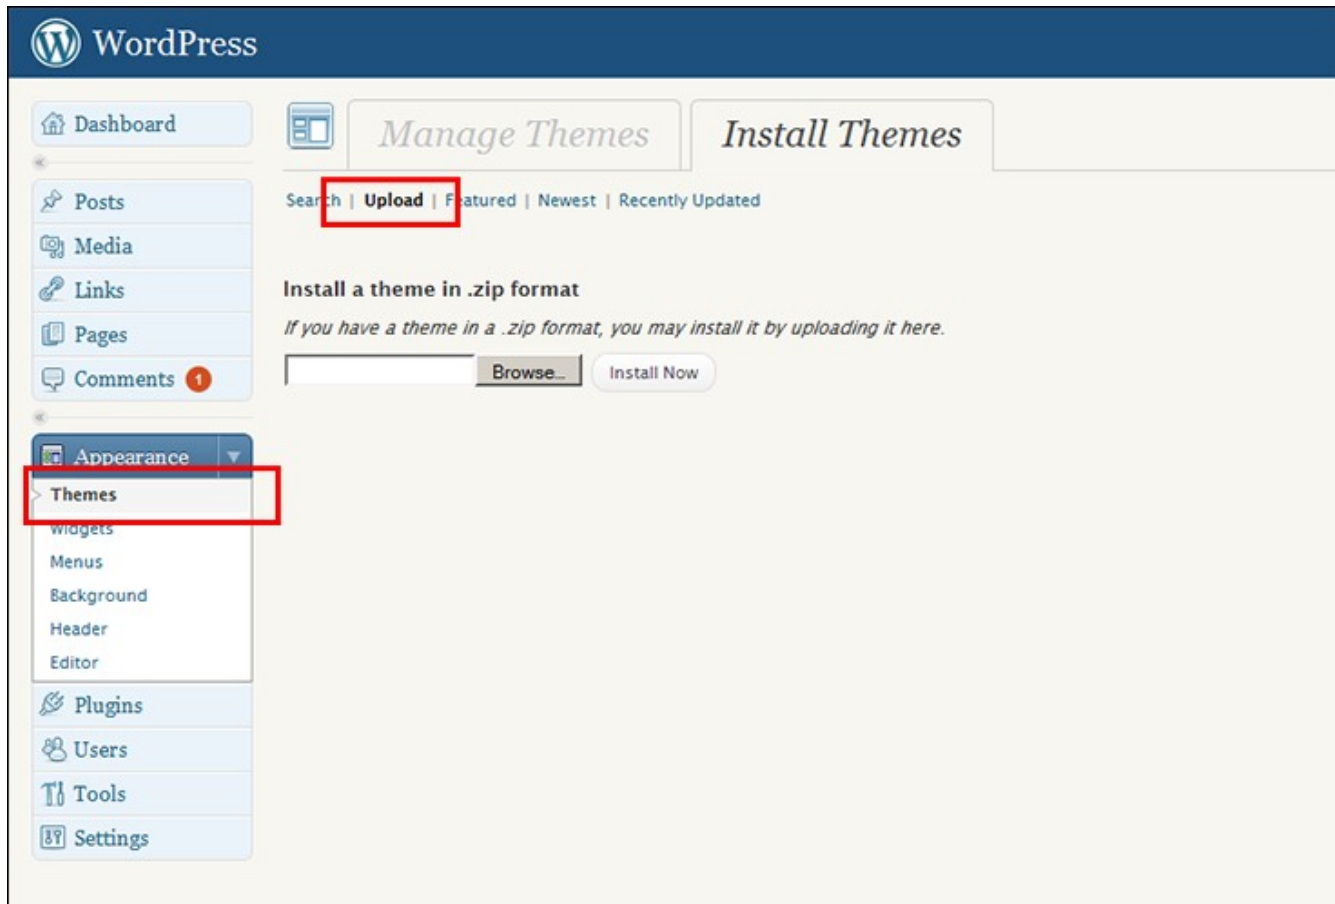

Got an error during installation process?

– **disable all your plugins and install again theme,**

– **make sure that you are running on latest release of WordPress**

– **try to upload manually theme on FTP, in the folder /wp-content/themes/**

2. CUSTOM MENUS

1. Go to **Appearance** → **Menus**

2. Create your own menus, using Categories, Pages or Custom Links

3. Specify your custom menus for **Theme Locations**

3. POST INSTALLATION STEPS

1. A new menu will appear on your Backend **– WPZOOM.** From this menu you will be able to configure **Themes Options**.

2. Navigate to **Appearance → Widgets** and add widgets to your theme.

4. HOW THUMBNAILS SYSTEM WORK?

Since the **WordPress 2.9** has been released we implementing in this theme the great feature called "**Featured Image**", which allows you to upload any image and use it as thumbnail.

On the left side you will see a box: **Featured Image**. Here you can upload an image, and then click "**Use as featured image**"

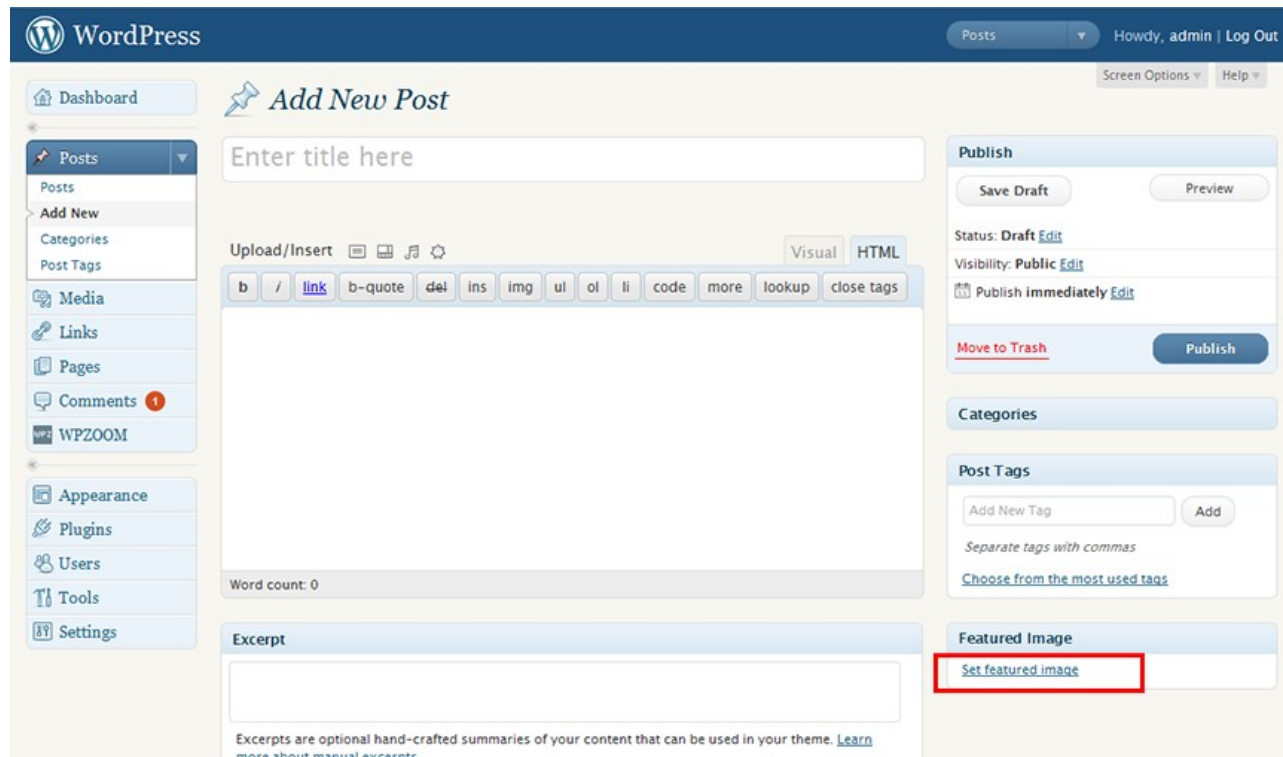

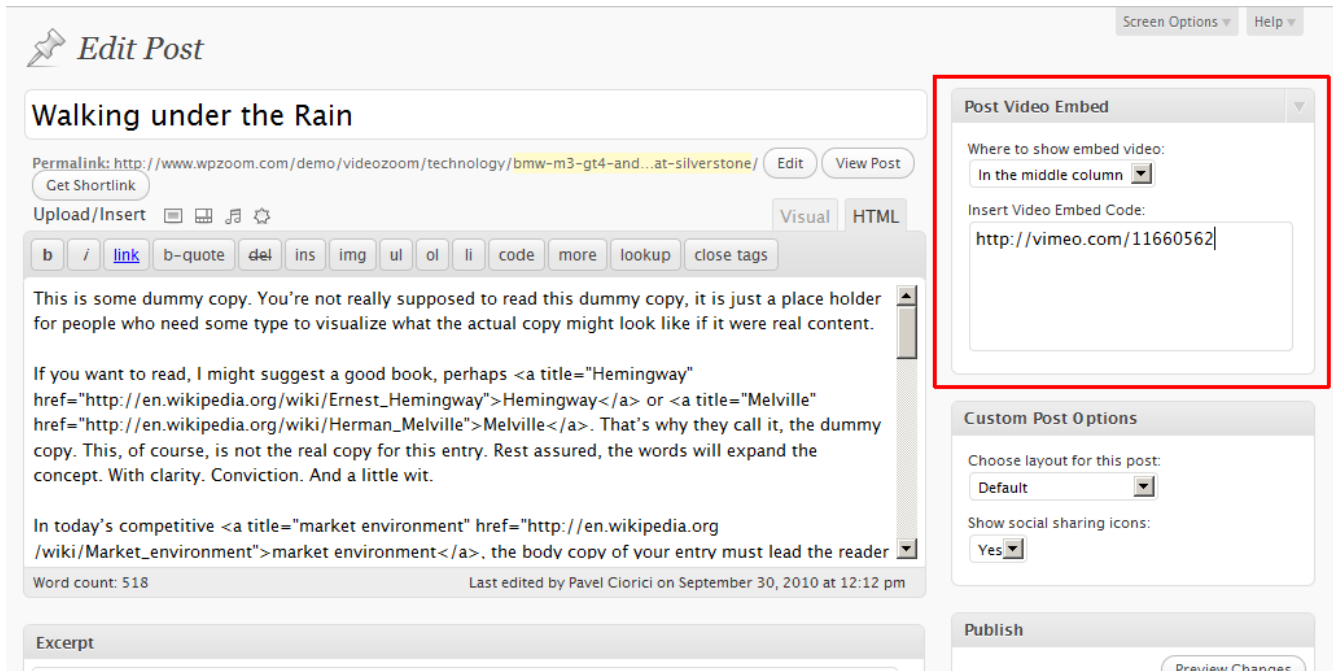

If no image will be selected as Featured Image, then the theme will pull the first image from articles content to be used as thumbnail.

5. ADD VIDEOS TO VIDEO SECTION

To assign a video to post (which will be displayed in Video Section on Homepage), insert URL or Embed code of the video in the "**Post Video Embed**" box, which is located on the right side on editing page.

At the moment this theme support video embeds from popular video sites, like:

- YouTube.com
- Vimeo.com
- Flickr.com
- Dailymotion.com
- Google Video
- MetaCafe
- CollegeHumor
- Yahoo Video
- MySpace TV
- ESPN
- LiveLeak
- MSNBC
- Ted.com
- and many other sites. Check full list on this page: http://autoembed.com/demos/

6. CUSTOM WIDGETS

This theme has 7 custom built-in widgets. You can find them in **wp-admin** → **Appearance** → **Widgets.**

In the following picture is showing how you can create a **Tabbed Widget**:

1. Drag "WPZOOM: Tabs" widget to Sidebar

2. Drag widgets you want to transform in tabs in "WPZOOM: Tabs Widget Area
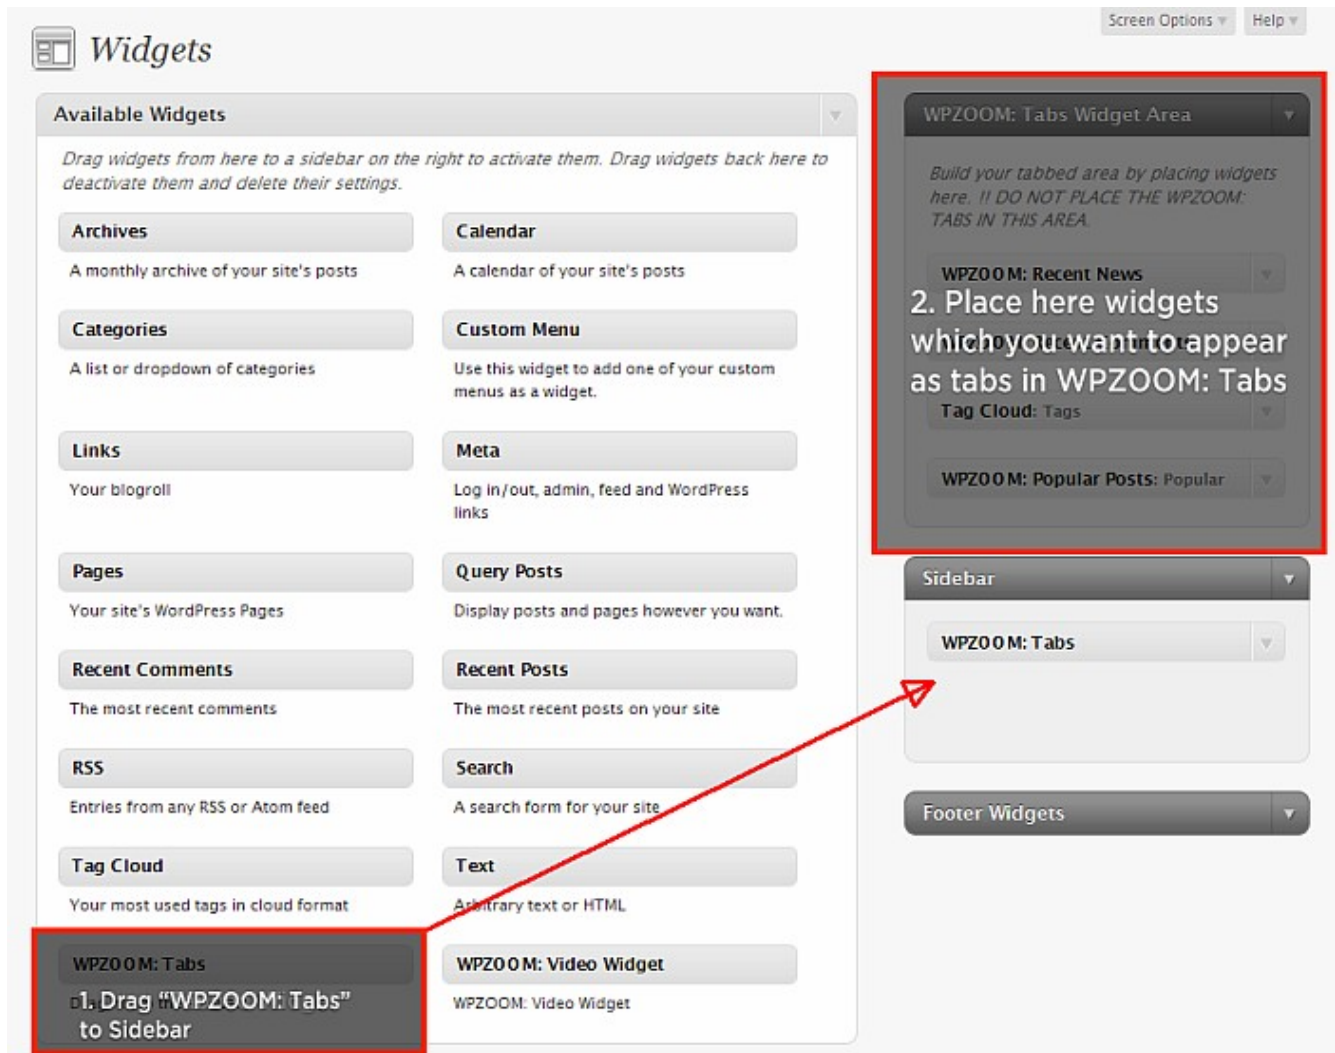

FILE PERMISSIONS

CadabraPress Theme uses the **TimThumb** PHP script for dynamic image resizing in some parts of the theme.

Set file permissions **777** (rwx-rwx-rwx) to:

/wp-content/themes/cadabrapress/scripts/

and

/wp-content/themes/cadabrapress/scripts/cache/

Otherwise TimThumb images resize script will not work properly.

Some important things to note:

*1. **TimThumb** requires the **GD library**, which is available on any host server with PHP 4.3+ installed.*

*2. On some hosts **TimThumb** will work with **755** permissions (rwx-rx-rx).On other hosts, you need to set 777 only to the /cache/ folder, while keeping 755 permissions for the /scripts/ folder.*

*3. If you are hosting your site with **HostGator**, take a look at this thread to solve the TimThumb issue: http://code.google.com/p/timthumb/issues/detail?id=8*

4. TimThumb requires that you use images hosted on the same domain, so you cannot insert(hotlink) images from other sites. You have to upload them to your site first.

HOW TO MANAGE SUMMARY CONTENT

Under the box where you insert your article's content, is placed another box called: **Excerpt.**

Here you can insert any content, you want to appear on Homepage in places like: Featured Section.

HOW TO CREATE FULL-WIDTH PAGES

When you are trying to create a new page, you'll see a box called "**Template**", and select from that list "**Full Width**" template.
